

1. Plant Village Nepal Pvt.Ltd.

Plant Village Nepal, based in Kathmandu, Bagmati province transforms unused agricultural and forest biomass into biochar fertilizer via pyrolysis, boosting soil health and crop growth while offering it to farmers at discounted rates. The company also develops biological control agents to manage pests like Fall Armyworm and borers, aiming to address more agricultural challenges. This approach enhances soil, recycles waste, and offers eco-friendly pest management, improving productivity and sustainability while reducing environmental pollution and reliance on harmful chemicals.
