

1. Eco-Revive Research and Innovation

Eco-Revive, founded by biotech students is based in Karnali Province of Nepal which is a socially and environmentally conscious enterprise specializing in sustainable hair care solutions., it addresses the environmental and health issues of hair care products by using natural herbs, eco-enzymes, and other organic ingredients. They offer eco-friendly products such as shampoos and hair masks. Sourcing raw materials locally to ensure efficient production, their mission includes reducing environmental impact through bio enzyme technology, supporting organic farming of neem, reetha, shikakai, and citrus fruits, and promoting a circular economy. Their approach combines personal care with sustainability, creating a model for environmental responsibility and economic resilience.
